SUMMARY

Backend Software Engineer with **1.5+ years of experience** building scalable backend systems using **Java, Spring Boot, Microservices,** and **PostgreSQL**. At Zaggle, worked closely with architects and senior engineers on enterprise **SSO solutions (SAML 2.0/OpenSAML)**, **Kafka-based systems**, and **AI-driven automation using GPT-4o + FAISS**. Strong in **REST API development**, distributed systems, and building clean, maintainable backend applications.

PROFESSIONAL EXPERIENCE

Zaggle Prepaid Ocean Services Ltd, *Software Engineer* 10/2024 – 11/2025 | Hyderabad, India

Single Sign-On Implementation:

- Designed and implemented enterprise-grade SSO solutions using **SAML 2.0/OpenSAML**, supporting both IDP-initiated and SP-initiated authentication flows integrated with **Okta, Azure AD, ADFS, G-Suite, and Microsoft AD**.
- Built dynamic metadata generation, X.509 certificate management, and RSA-SHA256 digital signatures for secure SAML assertion validation.
- Developed RESTful APIs and SSO configuration workflows supporting multi-environment deployments across DEV, QA, Staging, and Production.
- Implemented Redis-based Single Logout (SLO) ensuring secure session termination across federated systems.

Zaggle App SmartReactor:

- Built an AI-driven tool using **GPT-4o** and **FAISS** to generate empathetic, brand-aligned responses for app reviews.
- Implemented semantic FAQ matching and built a lightweight Flask-based web application for real-time response generation.
- Improved consistency and automation of customer engagement workflows across feedback channels.

Travel Advance Module (EMS Platform):

- Part of a 25-member engineering team building Zaggle's enterprise travel booking platform handling booking lifecycle flows through travel partners and GDS integrations.
- Developed Spring Boot microservices for multi-mode travel booking integrated with Yatra and Paxes, including policy validation through a SpEL-based Rules Engine and dynamic Action APIs.
- Built Kafka-based event-driven onboarding services and scalable consumer workflows for asynchronous processing across microservices.
- Developed unified Fare Calculation APIs with audit-friendly financial workflows and external service integrations for transparency and compliance.

SJLT Spinning Mills Pvt. Ltd, *PHP Web Developer* 11/2025 – Present | Tamil Nadu, India

Wovens Textile Management System

- Architected and developed a comprehensive **Textile Manufacturing ERP System** covering sales, production, inventory, planning, costing, and quality control using **PHP, MySQL, JavaScript, and AJAX**.
- Implemented **real-time production monitoring** for 48+ looms using **Chart.js dashboards**, enabling KPI tracking and efficiency analysis.
- Designed a **dual-database architecture** separating operational and master data, ensuring data integrity, scalability, and reliable transaction processing.
- Developed automated workflows including **multi-level approvals**, work order management, production scheduling, and inventory allocation.
- Built inventory and procurement modules with **yarn bidding, gate entry tracking, stock allocation**, and dynamic AJAX-driven forms.
- Integrated **PDF/Excel reporting** using **TCPDF, DomPDF, and PhpSpreadsheet**, along with CSV import/export for operational reporting.
- Implemented **role-based access control**, secure session management, input validation, and SQL injection prevention.
- Developed responsive interfaces using **HTML5, CSS3, JavaScript, jQuery**, and built features such as UUID-based order tracking and QR code generation.
- Followed **MVC architecture**, modular coding practices, and Git-based version control to ensure maintainability and collaboration.

SKILLS

Languages: Java, Python, PHP, HTML, CSS, JS, SQL

Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices

Security & Authentication: SAML 2.0, OpenSAML, JWT, OAuth2, X.509 Certificates

Messaging & Integration: Apache Kafka, Third-Party REST API Integration

Databases: MySQL, PostgreSQL, PHPMyAdmin, Query Optimization, Schema Design.

Tools: Git, Maven, Docker, Postman, Swagger / OpenAPI, IntelliJ IDEA, JUnit, Mockito

Practices: Agile / Scrum, SDLC, Code Reviews, API Testing, Debugging, AWS.

EDUCATION

Master of Technology in Computer Engineering, *UOT* 2025 – Present | Rajasthan
